

Satellite radio is the best thing that has happened to radio in the last two decades. Unlike conventional radio, Satellite Radio customers actually pay for the service. Therefore, we don't have to listen to the commercials-- We get the music and information we want to hear without having to deal with stations advertising ploys, as well as, "radio's" commercialized playlist of bands that the music companies want us to listen to. Satellite Radio isn't about sales, it's about the music... and that is why I PAY good money for this service. I will continue to use and pay for this service as long as it's available.
